

GSM | GPRS Compact

Product Description

The Quad-band 850/900/1800/1900 MHz GSM|GPRS GC864-QUAD V2 is designed for industrial applications requiring a compact footprint and board-to-board connector. The xC864 family provides pin-to-pin compatibility with its UMTS|CDMA counterpart products. This module allows a SIM holder to be mounted on the bottom side of its PCB. This option reduces the integration effort.

Key Benefits

- Design once and deploy globally thanks to the xC864 unified form factor
- Easy firmware update by transmitting only a small delta file
- PYTHON Script Interpreter customers can run their Python applications directly inside the module
- RUN AT Remote command and event monitoring services
- SIM Access Profile
- Premium FOTA Management Easy firmware update by transmitting only a small delta file

Family Concept

The xC864 Unified Form Factor family includes GSM | GPRS, UMTS | HSDPA and CDMA 1xRTT air interfaces in cellular modules featuring a common 30x36.2 mm footprint with the same 80-pin board-to-board connector. This allows developers and integrators to easily drop in different xC864 family modules supporting any of the major cellular technologies listed above with little design and integration time and effort.
